Marsden V-110: Our most portable high capacity vet scale

High capacity and low price combine with the V-110 - our most portable large veterinary scale, suitable for regular weighing in surgeries, on the move and in the home.

Affordable weighing

Considering its capacity, size and accuracy, the V-110 weighs in at a very attractive price. This stylish, one piece scale costs barely more than much smaller scales - yet it can weigh animals upto a capacity of 150kg.

More portable than most

The V-110's one-piece moulded plastic design keeps weight low. This means carrying the scale is much easier, and in turn it's much better if your veterinary scale needs to be transported regularly.

The scale weighs just 5.5 kg - that's barely more than many of the smaller veterinary scales on the market. And, because the weight display is integrated rather than a separate, transportation is fuss-free.

Suitable for most pets

The V-110's weighing surface is 900mm x 500mm - that's enough to allow you to weigh most pets. Its durable, non-slip surface is also ideal for more nervous pets. Don't forget, if the animal struggles to keep still on the scale, you can press 'Hold' to stabilise the weight reading on the display.

Key features

- Lightweight, one piece design
- Unit switchable between kg and lb
- Large, clear integrated LCD display
- Tare and Hold functions

Simple, clear weight results

An integrated digital weight display means the results are clear, instantly. Plus, weight readings can be either in kg/g or lb.
